

Chronological Digital Record Package

Court-Usable, Non-Forensic Documentation

Flat Price: \$159

Date: December 27, 2025

This service produces a clear, chronological PDF record of your digital communications that you can bring to court or provide to an attorney. The document is organized for readability and credibility, without making forensic or legal claims.

What You Receive

Deliverable	Description
Chronological PDF	One complete, print-ready PDF showing messages in exact time order
Source Summary	Device and platform summary with date range and scope
Master Timeline	Cross-source timeline aligning messages and captures
Message Records	Full iPhone text message conversation (one thread)
Social Capture	Best-effort capture of visible social media content
Metadata Page	How the document was created, clearly and safely explained

What This Is (and Is Not)

This is a technical documentation service. It organizes your information so a judge or attorney can easily understand the sequence of events. It does not include legal advice, forensic examination, or opinions about admissibility.

You retain full control of your device and data at all times. All exports are performed using Apple-supported methods.

This package is designed for individuals who need a professional, credible record without the cost and complexity of full forensic analysis.
